

MISSION

Daily we use sources of fuel from the earth – such as trees, coal and water – to propel our lives. These fuels are in limited supply, and many will not last forever. Simple actions can use a lot of fuel or help you (and nature) maintain and protect a high fuel level. Finding natural sources of energy such as sun and wind, and changing our daily habits doesn't require superpowers. It simply means thinking in new and creative ways. Fuel up in this Quest, by using people power to reduce the effects of humans on nature.

- Complete the Quest.
- Activate your team and complete a service project!
- Congratulations, you have completed Nature Quest!
- Start the game again at a new location or with a new team.
