

MISSION 

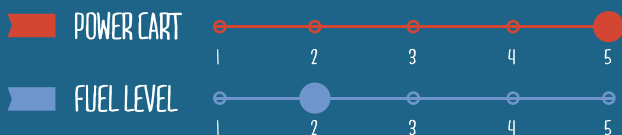

As we saw in our Head-to-Head combat, operating alone isn't always the best way to survive. Some animals travel in pairs or packs to gather or hunt for food, protect themselves and build their homes. Traveling in packs has the advantage of giving predators more eyes, ears and noses to detect and escape predators. Likewise, predators travelling in packs have the advantage of teaming up to tackle a large prey or many more prey or simply to gather more food. In this Quest, team up in pairs and beyond to build community and work together to survive.

- Complete the Quest.
- Venture on a hike or play in nature teaming up with other players.
- Share the power levels each of you possess.

 **Imagine a scenario where you are faced with a challenge.**

 **How does teaming up help you survive the challenge?**

QUEST 

## PERFECT PAIRS

- 1 *Group up with 1 or 2 other players.*
- 2 *Link arms with the players in your group.*
- 3 *Staying linked, locate and collect 5 treasures that are brown in color and pile them near the leader.*
- 4 *On your mark, get set, go!  
Whoever completes the challenge first wins.*
- 5 *Repeat collecting 5 seeds and again collecting 5 rocks.*

## CARRY ON

- 1 *From the items collected in Perfect Pairs, create 2 piles of sticks, leaves, seeds, or rocks.*
- 2 *Form two teams.*
- 3 *Line up in a row holding hands in front of the nature pile with your teammates.*
- 4 *Each team tries to pass the items across the row while continuing to hold hands.*
- 5 *The first team to complete wins.*
